APPLICATIONS

The Hut' is an emergency shelter tent which is ideal for:

-  receiving the assisting people, supporting populations
-  first-aid stations
-  command posts, operational support.

Versatile, ergonomic and intuitive, the Hut' can be installed by anyone (professionals or volunteers) in less than 10 minutes. 

Modular and partitionable depending on the type of disaster or the number of people affected.

Once deployed, the Hut' are self-contained and can be connected to adapt to any kind of situation

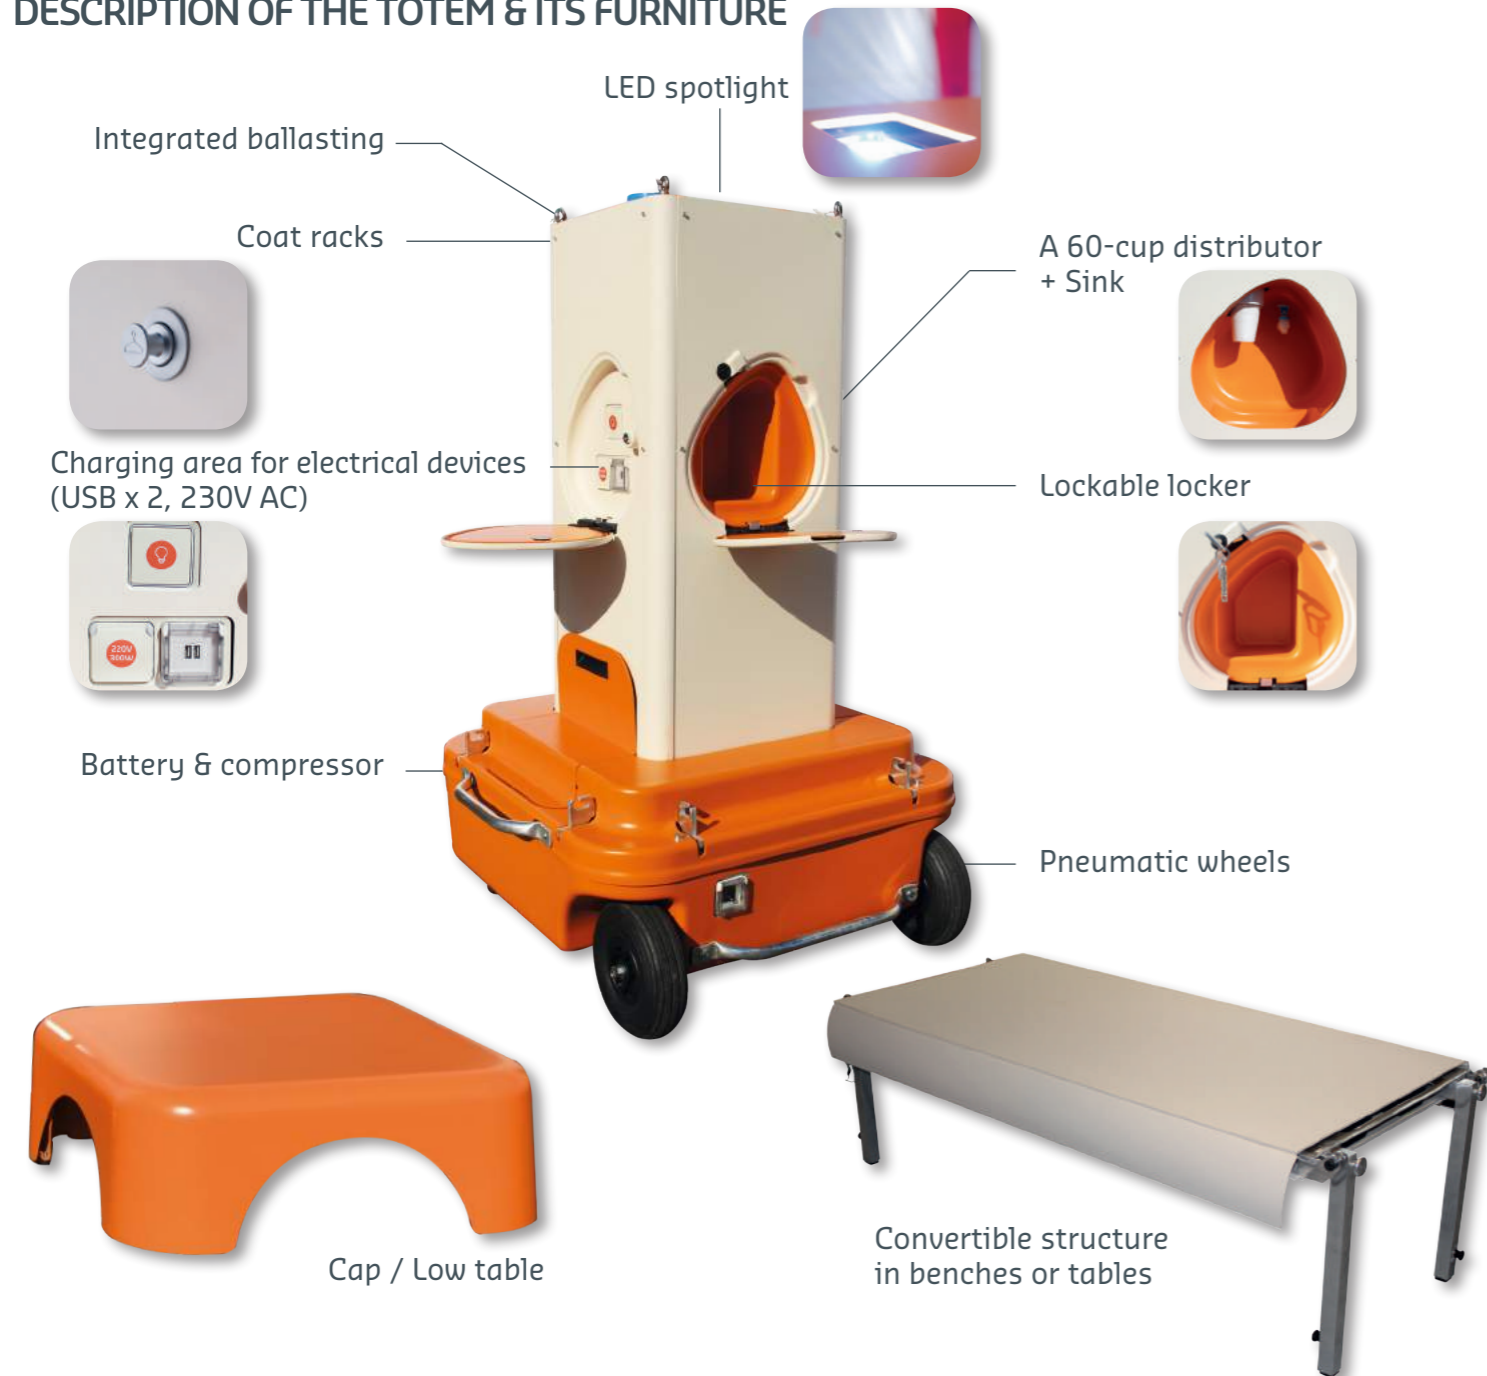

SPECIFICATIONS

The Hut' is an all-in-one shelter (patented system) that can be deployed either outdoors or indoors, made up of an inflatable tent (air-tight dual membrane), a mobile totem and furniture.

As an all-in-one system, the Hut' turns into a complete reception area
